

STRIP-N-STICK® SILICONE RUBBER ADHESIVE TAPES

A Furon Product Series

- **Easy to apply**
- **Compressible and flexible**
- **Conforms to irregular shapes**
- **Eliminates die cutting**
- **High adhesion to stainless steel, plastics, aluminum and composites**
- **Low compression set**
- **Available in closed-cell sponge, low density foam, or solid rubber**

Strip-N-Stick is the trade name for the CHR® family of silicone rubber tapes. For extreme temperature applications, Strip-N-Stick silicone rubber tapes out-perform all other elastomers in service life, weatherability, compression set resistance, and electrical resistivity.

These pressure sensitive Strip-N-Stick tapes are available in a variety of widths and thicknesses for use in gasketing, cushioning, thermal insulation, and vibration dampening applications. Other uses include noise reduction, clamping of hot parts, and electrolysis reduction between dissimilar metals.

Strip-N-Stick tapes, which provide all the benefits of silicone rubber in an easy-to-apply, pressure-sensitive tape form, are available in standard stock widths or slit to order.

- **100S** is a silicone sponge with a high temperature silicone adhesive.
- **200A** is a silicone sponge with an aggressive acrylic adhesive.

• **300AR** is a reinforced silicone sponge with an aggressive acrylic adhesive. Its unique construction provides the compressibility of sponge and dimensional stability of fiberglass reinforcement. Stretch is eliminated, which contributes to the consistent size and shape of cut parts and inhibits outward extrusion under high pressure. It further permits close tolerance slitting.

- **440S** combines a 30 durometer solid rubber with a high temperature silicone adhesive.
- **440A** combines a 30 durometer solid rubber with an acrylic adhesive. It provides for high elongation and good conformability, and is an excellent gasketing material.
- **512AF** uses CHR F12 fireblocking foam along with a film-supported acrylic pressure sensitive adhesive.

STRIP-N-STICK® SILICONE RUBBER ADHESIVE TAPES

A Furon Product Series

Physical Properties	Unit of Measurement	Sponge 100S	Sponge 200A	Sponge Reinforced 300AR	Solid 440S	Solid 440A	Foam 512AF	ASTM Test Method
Adhesion to Steel*	oz/in (gm/cm)	15 (168)	30 (335)	30 (335)	15 (168)	30 (335)	30 (335)	D1000
Compression deflection	psi (Kpa) compressed to 75% of original thickness	6-14 (41.3 –96.5)	6-14 (41.3 –96.5)	8-16 (55.1 –110.2)	40 – 50 (275.6 –344.5)	40 – 50 (275.6 –344.5)	1 – 5 (6.89 –34.5)	D1056
Tensile Strength	psi (MPa)	65 (.448)	65 (.448)	100 (fabric break, ppi) (17.9 kg/cm)	700 (4.82)	700 (4.82)	20 (film break, ppi) (3.6 kg/cm)	D412
Elongation	%	150	150	<10	650	650	75	D412
Compression Set	% (compressed 50% for 22 hrs. @ 212°F)	25	25	25	30 (compressed to 75% of original thickness)	30 (compressed to 75% of original thickness)	5	D1056
Density of Backing	lb/in ³ (g/cc)	.019 (.526)	.019 (.526)	.020 (.554)	.040 (1.11)	.040 (1.11)	.007 (.194)	D3574

**Special order, minimum quantity.

***Thickness tolerances for backing only.

Important Notice to Purchaser: The following is made in lieu of all warranties, express or implied. Seller's and manufacturer's only obligation shall be to replace such quantity of the product found to be defective. Neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith. The foregoing may not be changed except by an agreement signed by officers of seller and manufacturer. Specifications subject to change without notice.

Cell Size: COHRLastic silicone sponge products may show variations in cell size. This is not cause for rejection if CHR finished product standards are met.

Strip-N-Stick Dimensions: Upon removal of the liner, the potential exists for dimension changes as the sponge relaxes.
